

A close-up photograph of a woman with blonde hair and blue eyes, smiling warmly. Her face is partially hidden behind a large, vibrant green leaf that runs vertically down the right side of the frame. The background is a soft-focus green, suggesting a natural, outdoor setting. The overall mood is fresh, healthy, and natural.

CARLSON®

Why Choose Carlson

As one of the first supplement companies to discover the value of all-natural vitamin E, we opened our doors in 1965 with a single vitamin E product. Carlson soon expanded to offer one of the most complete lines of natural-source vitamin E in the world. Vitamin E in supplement form is praised as a powerful antioxidant that helps promote cardiovascular system health, but it also has many benefits when used topically. Carlson offers a variety of all-natural vitamin E body care products that are free of parabens; phthalates; PABA; and artificial dyes, colors, and scents. All Carlson body care products are made in the USA and are not tested on animals.
